METRICS

Definition: A system of measurement to tell you how well you are progressing toward achieving your long-term vision.

Rule: As important as measurements are, by themselves they are worthless. Unless an effective feedback system exists, measurements are a waste of time, money, and effort. Specific feedback is required to enable decision makers to react to data and correct problems and reward accomplishments.

BASIC METRICS

- How do you rate the quality of our products and services?
- How do you rate our responsiveness to your concerns?
- How easy are we to do business with?
- What products/services should we offer that are not now offered?
- How can we improve your level of satisfaction?
- What do you need from us to do your best work?
- What is working well that we should keep doing?
- What is not working well and requires adjustment?
- What ideas do you have that would improve our partnership?

CURRENT INRMP METRICS

- Installation Name and State.
- Date Planned for Next INRMP Revision.
- Were Projects added as a result of Feedback form Operators?
- Has Annual Feedback been Requested from FWS & State?
- \$ Required for Class 0 & 1 projects.
- Has the Public had Opportunity to Comment on the INRMP?

ASN (E) TASK

Develop metrics that will give leadership a better indication of the successfulness of our partnerships with the FWS and State Fish & Game Agencies to develop and implement INRMPs.

METHODOLOGY

- NAVFAC held a Meeting with many of our Installation, Regional, Field Division, and HQ Natural Resources staff, with several State and FWS people to:
 - Determine the "Focus Areas" Important to the Navy, FWS, and State that can be measured to rate Program Success.
 - Determine the "Criteria" that should be used to measure/rate each Focus Area.
 - Develop a measuring/rating system that can be used to give each Focus Area a GREEN, YELLOW, or RED rating.
 - Develop a system/process to get the Navy, FWS, and State Stakeholders together annually to produce the new Metrics.

We measure what is important to us. When there is a general agreement about what is important, it is easier to decide what to measure....ONE SHARED VISION.

FOCUS AREAS

- Assessment of Ecosystem Integrity
- Assessment of INRMP Impact on the Installation Mission
- Assessment of Partnerships/Cooperation and Effectiveness
- Assessment of the Status of Federally Listed Species and CH
- Assessment of Staffing Adequacy
- Assessment of INRMP Implementation

CRITERIA FOR RATING THE FOCUS AREAS

ANNUAL REVIEW PROCESS

(Modeled After SOUTHDIV/CNRSE Process)

SOUTHDIV and CNRSE have been conducting Annual INRMP Reviews with their State and FWS Partners for Several Years with Very Successful Results.

- Conduct Annual Reviews using new Metric Protocols.
- Can enter Results on the Data Call Station real-time or soon after the Review.
- The Data Call Station is set up to produce a Metric Report to be used, in conjunction with current reports, during the IPRs.

INRMP Implementation

Findings:

• Several Class 1 Projects not funded, due to incomplete proposal submissions.

Recommendation(s):

• Ensure that proposals for unfunded projects are properly submitted through the EPR Web.

Staffing Adequacy

Findings:

• Billet for the NR Manager position remains open.

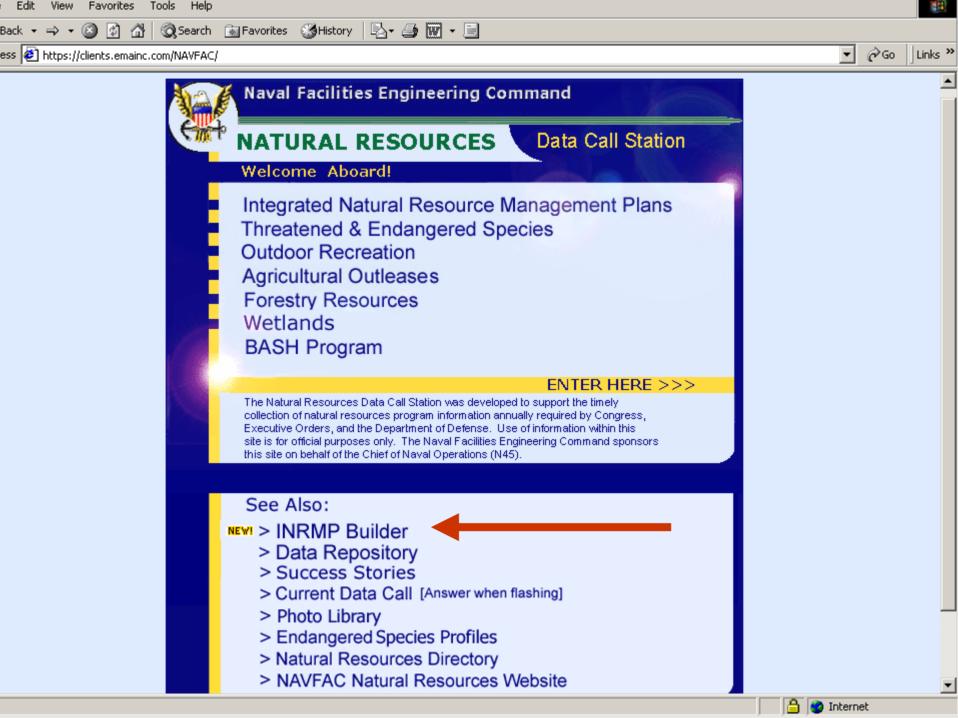

Recommendation(s):

• Fill the NR Manager vacancy.

INRMP Purpose

Goals of the Plan

- 1.2.1 Plan Contributors, including stakeholders
- 1.2.2 Description of Public Participation Process
 - Include all public comments in the Appendix with Navy responses.

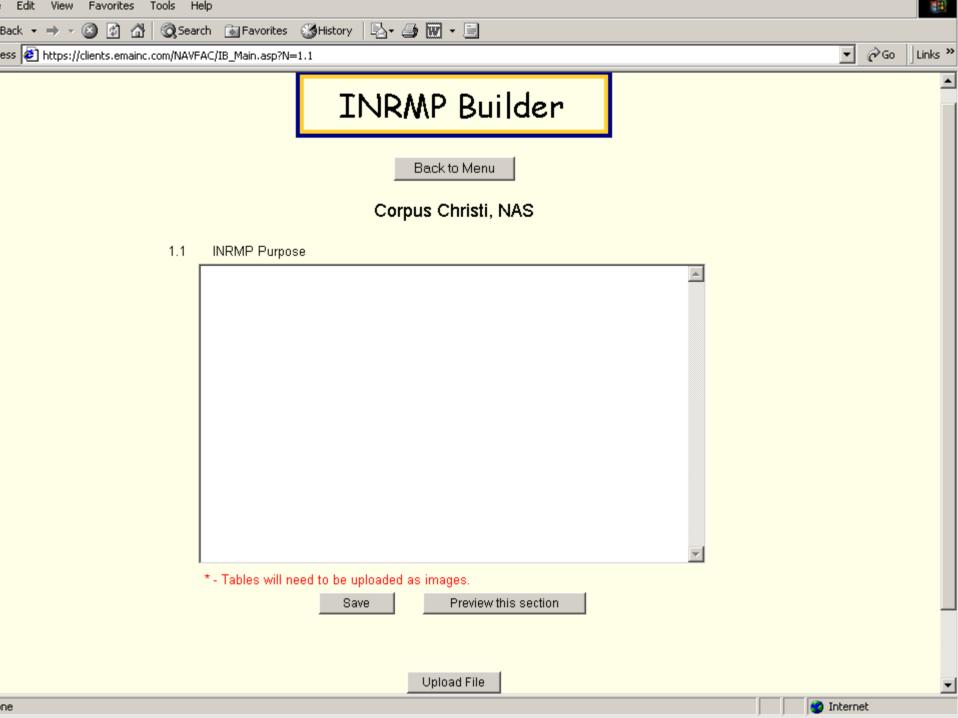

Responsibilities

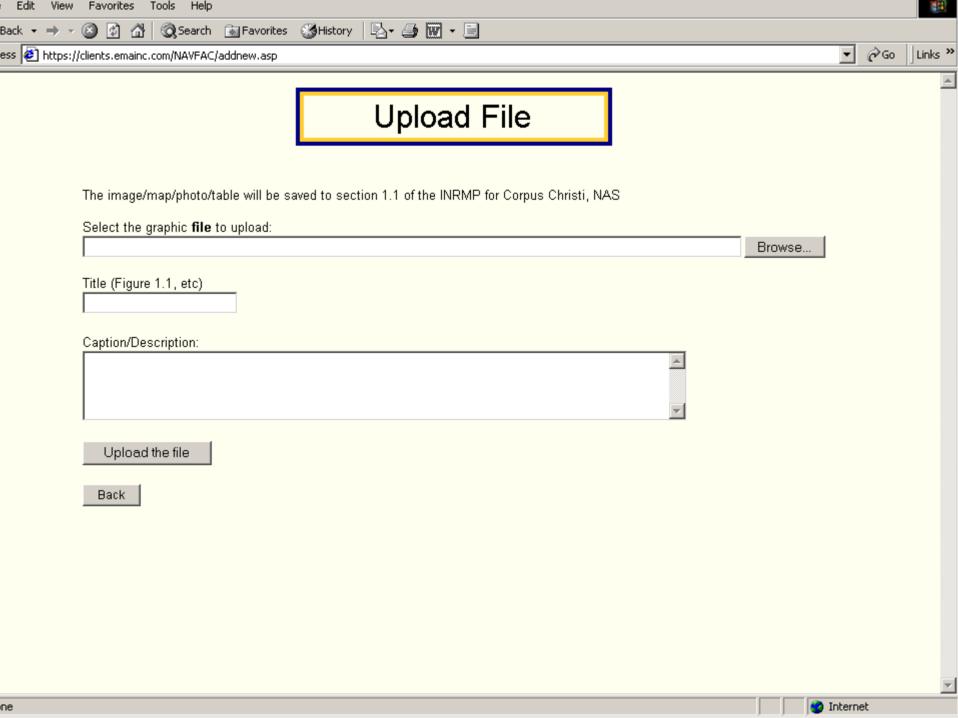

- Include an organizational chart for the installation as well as one specific to environmental responsibilities.
- Address number and type of staff within the Environmental Directorate and Natural Resources staffing that support the installation.

Military Mission

- 1.4.1 Military Mission and Strategic Vision of Future Land Use
- 1.4.2 Mission Statement(s)
 - Address/identify tenant commands, and frequent and intermittent land users.
- 1.4.3 Future Mission Requirements
